## DRY SUITS — FLEXIA

With all the incredible features of the OCEANIC Flexia Dry Suit, the FLEXIA offers stretch like no other membrane dry suit on the market today. Using Oceanic's unique Bias Stretch Technology (B.S.T) the FLEXIA offers maximum comfort and unrivalled flexibility.

Specially designed and carefully placed Flexia Smart Panels (F.S.P.), stretch with your body, creating a freedom of movement, never before experienced before in a membrane dry suit.

Contrast blue stitching shows the sleek body imaging design, whilst reflective tape on the arms is a great safety feature.

Altogether the OCEANIC FLEXIA combines all the qualities of a first class dive suit - comfort, durability and protection.

Take the Bias Stretch Technology test at your Authorised Oceanic Dealer and experience the FLEXIA FEELING.

### MATERIAL

**OUTER LINING:** Heavy duty 180 grammes per square metre tight weave polyester material for the optimum balance of robustness and comfort.

**INNER LINING:** 80 grammes per square metre fine weave polyester material for comfort and ease of donning.

**VISIBILITY AND SAFETY:** Reflective tape has been fitted to each wrist to enhance surface visibility and safety. Reflective logo on the backs of the ankles offer good water identification.

**BIAS CUT;** This patent applied for feature revolutionises the membrane suit offering incredible comfort and enhanced body contouring with all the strength advantages of the tough and proven square woven trilaminate materials. The 45 degree bias cutting of all the panels and the redesign of the back panel results in a 15% stretch factor in every suit panel in both girth and vertical

### SPECIFICATIONS

#### INFLATOR:

—Apeks Marine” Swivel auto inflator

#### DUMP:

—“Apeks Marine” Low profile automatic shoulder Dump

#### MAIN ZIPPER:

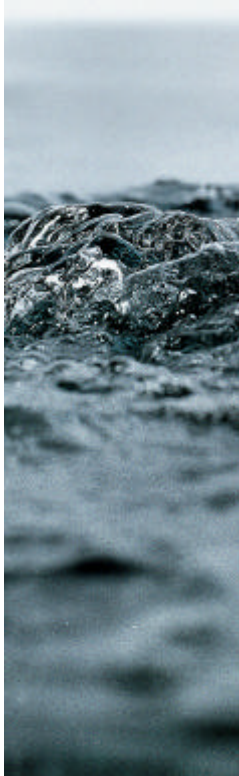

—Rear shoulder entry “Y.K.K. New Zipper” PU. Tape, 8 teeth to the inch.

#### NECK SEAL:

-Comfortable 30 thou. thick “Seamtite” bellows neck seal fitted with 7 adjusting rings, taped both internally and externally to the suit

#### WRIST SEALS:

—Heavy Duty 40 thou thick “Seamtite” latex bottle seals (Same design as the Aquion seals). Taped internally and externally. The NEW “Seamtite” latex material allows for better adhesion of glued tapes. It is compatible with heat tape systems. It is less prone to ultra violet attack

## SPECIFICATIONS Contd.

### STITCH:

–Double lock stitch

### THREAD:

–*Top* 40 weight nylon bonded. *Bottom looper* 75 weight core spun polyester

### SIDE SEAMS:

–Pre double glued. Double overlapped run of Trilaminare nylon heavy duty bias 28mm wide hot air tape

### CROTCH SEAMS:

–Pre double glued. Triple overlapped run of Trilaminare nylon heavy duty bias 28mm wide hot air tape

### ALL OTHER SEAMS:

–Pre double glued. Single run of Trilaminare nylon heavy duty bias 28mm wide hot air tape

### BOOTS:

–5mm neoprene with tough external vulcanisation, reinforced sole and fin cleats.

### KNEE AND SHIN REINFORCEMENT:

: Double layer of heavy duty 180 grammes per sq. metre polyester material for flexibility and strength. Fitted with drain holes;

## FEATURES

### Elasticated Back;

–Internal elasticated waist section for better fit and minimising air within the suit

### Brace Tabs;
