The Black, by Aerdura, out of Oceanic

Oceanic's latest version of the renowned Aerdura Dry Suit is the "Black" Bred from the pedigree stock of the Aerdura, the suit supplied to the British Armed Forces.

On the outside, a layer of heavy duty Cordura™ offers long lasting strength and durability.

Next comes fourteen layers of impermeable rubber butyl membrane, half of which are impregnated with titanium oxide to form an infra red reflective barrier.

However, the real secret of it's effectiveness lies within the thermal reflective 'fine satin' weave polyester lining. This is also impregnated with Titanium Oxide for maximum warmth. This unique lining and it's silver grey finish are exclusive to Oceanic

FEATURES

CORDURA® TRILAMINATE WITH POLYESTER, TITANIUM LINING.

The material, unique to Oceanic, provides a tough, waterproof, comfortable membrane between you and the environment. We only use a genuine Cordura™ material, unlike a number of our competitors suits who use a cheap imitation.

Seven layers of Titanium Oxide impregnated butyl, forming an infra-red reflective barrier

BIAS CUT

The Black pattern and cutting utilises the full benefit of the Oceanic BIAS system. The Bias cut, patent applied for, gives up to 15% stretch in those suit panels where it counts.

TELESCOPIC BODY

The telescopic body of the Black gives the diver a greater amount of comfort both on and under the water.

WARM NECK COLLAR

The latest design, proven to give that extra warmth around the neck and top of the spine.

NEW DESIGN ZIP PROTECTOR

An innovative design in zip protection, large enough to protect yet with no bulk to cause any discomfort.

REFLECTIVE TAPE

Lets you be seen and be safe.

BRACES

The Black is fitted with brace tabs and supplied with adjustable braces. This gives the user more comfort and style.

LAYERED CORDURA® KNEE PADS

An oversize additional layer of Cordura™ material to give protection to the vulnerable area around the knee and lower leg

NEOPRENE LINED BOOTS WITH FIN CLEATS.

5mm boots lined with neoprene for warmth and comfort. Reduces squeeze on the feet.

PROTECTIVE OVERCUFFS

Extended sleeves gives protection to the wrist seals, greatly reducing the chance of damage.

ELASTICATED WAIST

Designed to allow a better fit and style. Gives additional support when suit is at 'half-mast'!

SEAMS

All seams are double interlock sewn and double glued and then additionally sealed with hot melt flexi-tape.

VALVES

Fitted with 360 degree swivel inflation valve and adjustable shoulder mounted auto dump valve.

POCKET

Thigh mounted 'Balloon' style pocket. Enough room for spare mask or DSMB etc.

SEALS

All seals are ozone and ultra violet resistant. Heavy duty bottle neck wrist seals.

LIFE-TIME WARRANTY ON ALL SEAMS
