

REGULATORS – Alpha 8

The Alpha Standard. The standard by which all other entry-level regulators are judged. For recreational divers looking for professional performance at a reasonable price, the Alpha 8 makes the adventure of diving that much easier to experience.

Best Price / Performance ratio in its class

Not only is the Alpha 8 an economical buy for the diver on a budget, it is just as inexpensive to maintain. Standard replacement parts can cost as little as half of those in other regulators in its class.

Patented orthodontic mouthpiece

To further reduce jaw fatigue, the Alpha 8 features a patented Orthodontic Mouthpiece, designed to accommodate the natural overbite of the human jaw.

Nitrox Compatibility

The Alpha 8 is classified as being suitable for use with nitrox breathing gas mixtures containing up to 40% oxygen by volume without the need for special preparation, cleaning or component parts.

Valve Type	DEMAND
Adjustment	
Balancing System	
Integrated Purge Button	YES
Mouthpiece	ORTHODONTIC
Nitrox Compatibility	STANDARD TO 40%
Ambidextrous	
Integrated Swivel	
Weight (without hose)	6 OUNCES
Dimensions (front profile)	2.9 INCHES
First Stage Configurations	SP 5
Minimum Cracking Effort	1.1 CIW
Factory Set Inhalation Effort	1.2 - 1.4 CIW
Work of Breathing	1.47 JOULES (SP-5)
